

Smart IoT™ Lighting Solutions

**Illuminating**  
ENGINEERING SOCIETY

## **Illuminating Engineering Society (IES)**

### **Progress Report Award 2016**

awarded to the

### **PennSMART® Teres Universal Retrofit.**

The IES Progress Report Committee selects products throughout the lighting industry and showcases the newest, most innovative and significant developments in our industry.

**The PennSMART® Teres** is the only patent pending, fit-to-purpose universal retrofit option on the market which goes beyond traditional smart lighting. With its unique plug and play design, the PennSMART® Teres provides cities, universities, municipalities, first responders and system integrators the ability to affordably, easily and attractively convert to Smart IoT™ Lighting capabilities. Our universal retrofit provides enhanced security with a complete notification and surveillance system that works with existing installations regardless of manufacturer.

Representatives from PennGlobe/PennSMART will be receiving the Progress Report Award when we attend the

**IES Annual Conference** in Orlando, FL

October 23-25, 2016.
